

BIOPHILIA RECEIVES GRANT MONEY

SPECIAL TO THE SUN.

The Walton Education Foundation, a nonprofit organization, and Christopher Cherenzia, president of the foundation, presented a check for \$2,000 to Christy Scally, director of the E.O. Wilson Biophilia Center, during the Walton County School Board meeting Dec. 7. Funds were made possible through the Consortium of Florida Education Foundation's AT&T STEM at Work grant, which focuses real-world learning opportunities for students to see how science, technology, engineering and math are integrated in careers. The money will be used to purchase GPS equipment for students to use in plotting and tracking field studies at the Biophilia Center and will provide a greater understanding of how STEM (Science, Technology, Engineering and Mathematics) plays a major role in our everyday lives.
